

Dedication to the IVD industry?

We I.V.DO that™

What can the new Medix biochemica Group IVDo for you

Introducing Medix Biochemica

At Medix Biochemica,
in vitro diagnostics is our world.
It's all we do, every day.
So if there's an IVD thing you need,
chances are we IVDo that.

Let's find out what can we IVDo for you.

Something to suit your every IVD need?

We IVDo that

Our industry-leading IVD experts have decades of experience in the development of essential raw materials for diagnostic applications

The most comprehensive portfolio of IVD raw materials in the IVD world, with over 5,000 products including antibodies, antigens, enzymes, biospecimens, molecular reagents and more

From contract manufacturing to RNA and DNA polymerase engineering we're here, ready to help you

Independent, international and industry-leading?

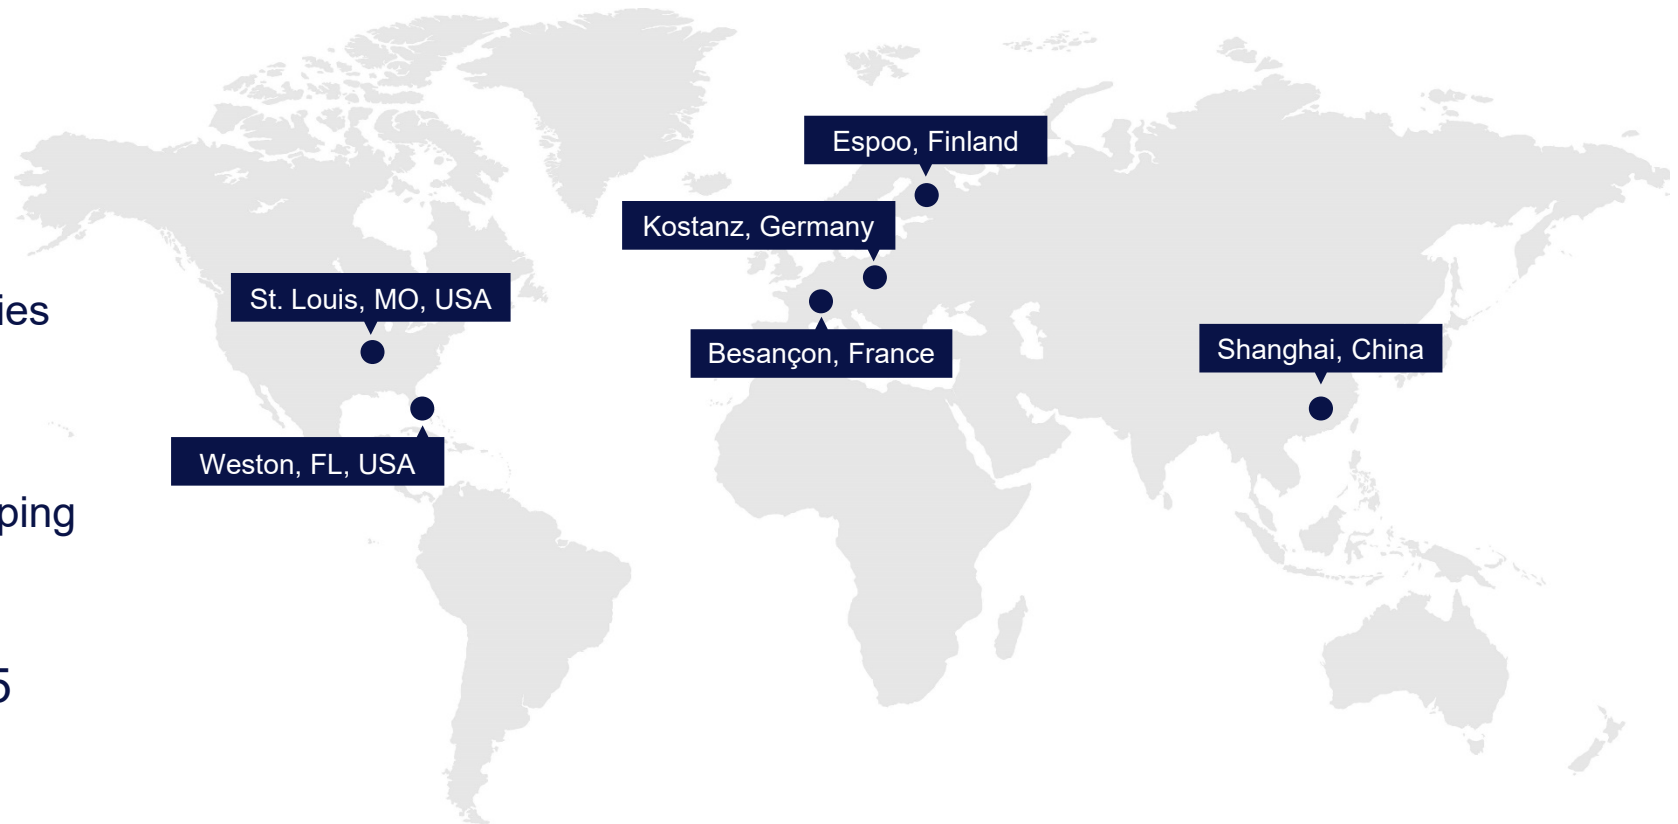

We IVDo that

We're wherever you are

- A truly global company with a proudly Finnish background
- Our products are used in over 70 countries
- Offices and manufacturing facilities all around the world

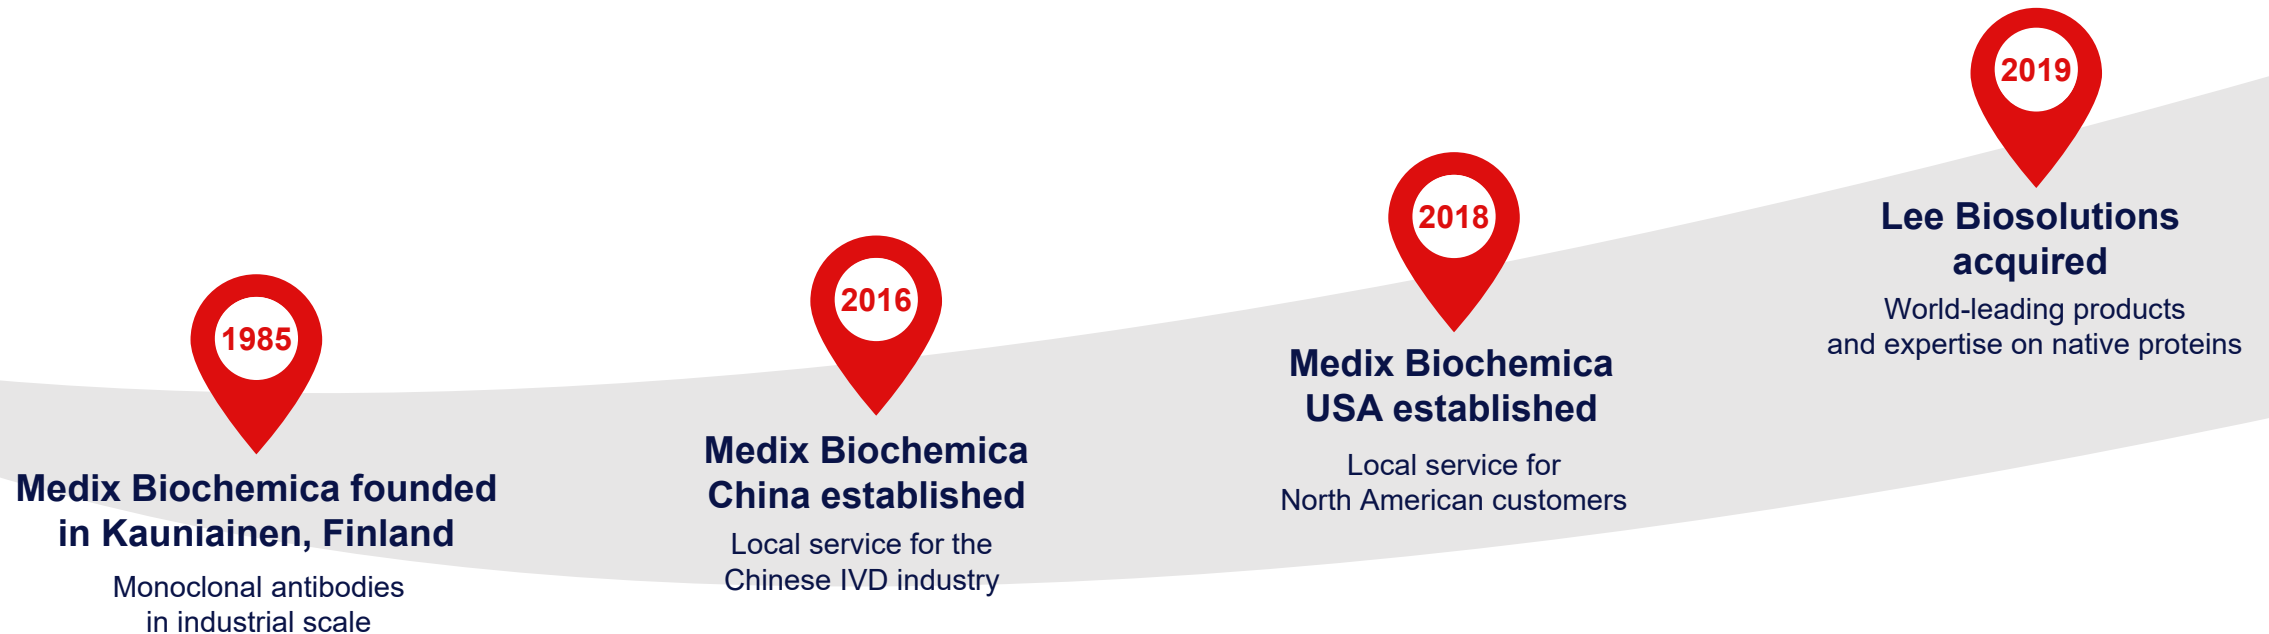

Employee expertise

- Decades of dedication to developing essential raw materials for diagnostic applications
- Over 270 employees, with 1 in 5 people work in R&D

Big ambitions...

We've dedicated decades to IVD, making bold moves and big acquisitions to help us build our expertise and expand what we can offer you, our customer.

Big acquisitions!

2020

EastCoast Bio & Biostride Inc. acquired

Radically more antibodies and antigens, especially for Drugs of abuse, veterinary and infectious diseases testing

2021

MedixMDx established & Diaclone acquired

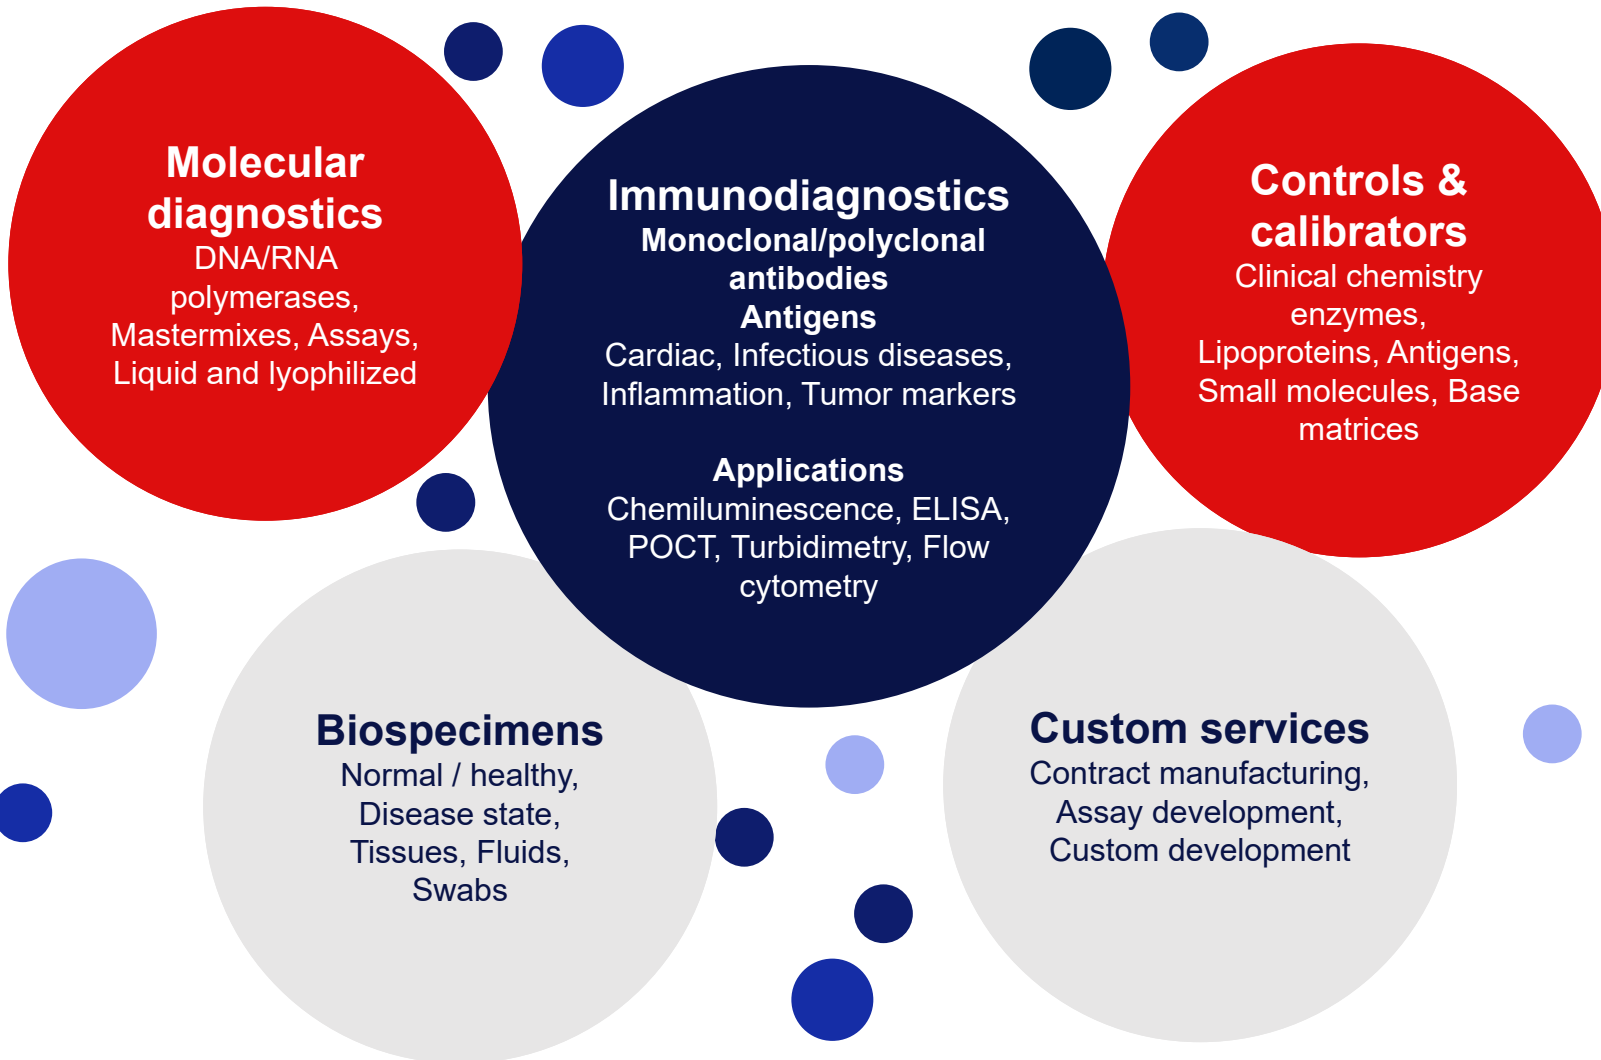

Kickstarted molecular diagnostics offering, plus unique antibodies and assays for immuno-oncology and inflammation

2022

myPOLS Biotec & Bioresource Technology acquired

Extending our molecular diagnostics offering and broadening our base matrix capabilities

Essential raw materials for all your assay development needs? We IVD do that
